FROM THE PUBLISHER

Hello and thank you,

Thank you. On behalf of our composers and editors, my colleagues in Dayton, and the customer service, fulfillment, and shipping teams at the distribution company we engaged in December, thank you. Thank you for your patience, understanding, and encouragement as we continue to work through another set of unprecedented challenges.

While the chip shortage and restaurant-hiring hardships got more news coverage, every organization in every segment of business and life struggled to purchase and hire. In our case, our distributor struggled to find staff to stock inventory and pick and pull orders. It's also been hard to find detail-oriented folks with music knowledge who want to provide customer service support. Paper has also been in very short supply, and when you can find supply, it costs three to four more times than it did even 6 months ago. Even our web developers—a large, international company—have been hard pressed to find programmers, which has delayed planned improvements and created unplanned service disruptions.

You matter to me. I'm not sharing this to elicit sympathy, or even understanding, although I do hope there is some. I am sharing this to share, because that's what you do with people who are important to you. You open up and let them see what you're going through, and Lorenz has gone through a lot. For those of you who went through parts of it with us—who had to spend valuable time on hold or change service plans at the last minute or make do with temporary files—I'm very sorry.

I care deeply about our mission—to discover, develop, and deliver publications that worship musicians and music educators use to inspire their communities—and I care even more about every individual who touches that mission. Knowing that I've fallen short for those folks, for you, weighs on me very much. We're not all the way there yet. Moving 27 semitrucks with more than 26,000 different products and many hundreds of thousands of individual items was always going to be a huge undertaking under the best of circumstances, and the last 10 months have been anything but the best.

But things are getting better. I know it's one thing to read that and another to see and believe it, but I would respectfully ask for your faith. This new release, for keyboard and choral too, is one of our best ever. We know that if you're ordering a book for Christmas—and you're going to want to order some of these new Christmas titles—you need it in plenty of time to practice well in advance of Christmas. We've expanded our available digital editions to help take a few steps out of the delivery process, but if you're like me and prefer your books on paper, we're much more prepared to fill those orders than we were last winter. We'll still need some patience—everything is just taking more time than it did pre-COVID—but even more, we need to hear our music, and we can't do that without you. I'm so excited about our future, grateful for our present, and honored to share both with you. Thank you for being together with us in music. It's never sounded better!

With appreciation,

Kris Kropff

Reflections of Praise

Music for Worship

Jane Marshall, arr.

Douglas E. Wagner

Marshall's numerous choral and vocal works have been mainstays of the American sacred choral repertoire since the late 1950s, and her original hymn tunes

have appeared in most major hymnals. Marshall did not compose any purely instrumental music, and this organ album seeks to fill that gap. Arranger Douglas E. Wagner has taken eight of Marshall's choral works and created idiomatic and compelling solo organ pieces from them. (2-staff, Mod. Easy)

The Fruit of the Spirit

Scriptural Reflections for Organ

Roberta Rowland-Raybold

After the success of *The Beatitudes* (70/2144L), Roberta Rowland-Raybold has returned to scripture with a set of organ pieces inspired by the Fruit of the Spirit from the book of Galatians. Each fruit has inspired an organ piece based on a traditional hymn with a thematic link. The organ pieces can certainly serve as individual voluntaries, though the complete group can also be used for a recital or special church service—proving especially effective if paired with readings, prayers, or poetry. (3-staff, Intermediate)

Inspirations

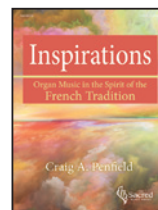

Organ Music in the Spirit of the French Tradition

Craig A. Penfield

The roots of Penfield's style are found among the French romantics. Steeped in this tradition from his earliest training (with Marcel Dupré's first American student), Penfield has long embodied a practical, contemporary manifestation of this beautiful period of the organ literature. The pieces in this volume are of course suitable for recital, though individual movements are also useful as service voluntaries. Of particular note is "Petite symphonie," a five-movement organ symphony well within the capabilities of many players who might not have felt themselves able to play a work in this style. Eight New Little Preludes & Fugues

For Organ, with Optional Pedal

Craig A. Penfield

Eight Little Preludes and Fugues (BWV 553–560), historically attributed to J.S. Bach, have been a cornerstone of organists' repertoire for many years. They are among the first works encountered by most organists during their training, and for many, they continue to remain an essential part of

the service-playing repertoire. With this volume, Penfield has created a new set that takes its inspiration from the original. Penfield has written these works in a mild neo-baroque style that combines strong elements of traditional baroque writing with some contemporary touches. Pedal throughout these pieces is entirely optional. There are markings of where pedal can be used, but any or all of these can be omitted, and the pedal notes are easily played entirely in the hands. Sacred Sounds from George Shearing for Organ

Based on Early American Hymn Tunes

George Shearing was one of the most well-known jazz pianists of his era. As a composer, he is known for his hundreds of popular titles, including the jazz standard Lullaby of Birdland. In the late 1970s, Shearing produced his only foray into classical church music, this volume of organ pieces (also available in a piano edition, KK228). Shearing's appealing jazz-inflected idiom makes for distinctive and memorable treatments of classic American hymn tunes. Shearing collaborated closely with Dale Wood in creating the details of these idiomatic organ arrangements. (3-staff, Mod. Adv.)

An Organ Book of Spirituals

Eugene Hancock

Originally released in 1966, this landmark collection by Eugene W. Hancock (1929–1993), was one of the first collections ever published dedicated to organ arrangements of African American spirituals. It received new attention in 2020 when the included arrangement of "Go, Tell It On the Mountain" was featured in Indiana University Jacobs School of Music's Organic Voices project. To allow for the widest use possible, Hancock intentionally aimed to write settings suitable for any size organ and by organists of any skill level. Though distinctive in sound, the arrangements are thus straightforward in texture, and the use of pedal is optional. (2-staff, Intermediate)
