Nurturing the Adolescent Female Voice

Dr. Lynne Gackle has long been an advocate for the power of singing as a catalyst for positive change and self-actualization in adolescent girls. Her landmark text is a synthesis of these ideas, reflecting her unmatched expertise on the working of the female voice and a lifetime of experience and research.

Serving to enlighten and encourage teachers and choral directors of these students, readers will learn the symptoms of vocal change in the female voice, along with physiological factors that affect it. Appropriate choral literature, recordings, and other educational materials are also presented. The included DVD, which may be used as a teaching tool in the classroom, provides demonstrations of the phases of vocal maturation, voice classification, vocal techniques, and other pedagogical strategies, all with the help of an all-girl choir (ages 12-16) under the direction of Dr. Gackle.

You who work with Middle and Junior High School choirs have followed a true calling. You are there for our young people during a time of intense vulnerability – emotionally, socially...vocally.

You are their encourager. You are their lifeline. In many cases you may be their one place of true belonging. And you are their *teacher*. Through music you are giving your students a language for expressing their deepest feelings and truest selves.

Those of us who write for Middle and Junior High School choirs have a calling to follow as well. And a big part of that calling is about being there for *you*. It's our responsibility to honor the triumphs and challenges your students experience every day and have that reflected in our music. We are honored to get to be a part of your team, and we want to do everything we can to support you and the profoundly meaningful work you do.

As a colleague and as a parent, I am very grateful for you.

Finding Your Teacher Voice

A guide to choral pedagogy with practical strategies for every classroom and choir

Katie O'Connor-Ballantyne

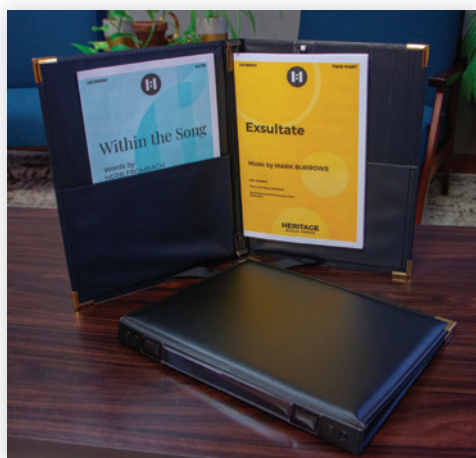

Singing is an integral part of any music classroom, but the voice works differently than other instruments and needs its own specific strategies. Whether you're an instrumentalist who finds yourself teaching choir, or a vocalist who is an expert at singing, this book can make your rehearsals more successful. Beginning with an exhortation to use your own voice as a singing example—even if it's not perfect—it presents all the skills your singers need to learn: posture, diction, pitch, notation, and the list goes on. Each chapter offers a clear overview of a singing goal, then lists several strategies you can use to achieve it with your group.
